> If you haven't yet read Centrix R68 Release Notes, we highly recommend it. R68 contained significant changes to the Centrix UI in addition to some new features.

Unified search function

Centrix now provides a unified search function to assist with locating entities by name/title.

The search function is available from any page by clicking the **Q** button on the top bar, or as a widget on the **Dashboard.**

This function will search across the following entity types;

- **Sites** (by name)
- **Alarms** (by name)
- **Assets** (by name)
- **Channels** (by name)
- **Bookmarks** (by title)

To perform a search, start typing some text into the search bar and the results will be shown underneath, grouped by entity type.

Where available, clicking on the items in the listing will take you to the relevant page for that item.

If you don't want to lose your search results when clicking through to an item, use **Ctrl+click** (Windows) or **Cmd+click** (Mac) to open the link in a new tab.

Example usage

If you know the name of an asset, but not sure what site it belongs to, let the unified search assist you;

- Open the unified search function
- Enter the name of your asset, **e.g. 704 Points**.
- Select **Channels** to list matched channels

The name of the site will be displayed next to the channel.

Dashboard: Quick links and stats widgets merged

The dashboard provided two separate widgets for **Quick links** and **Stats**.

These have now been combined into a single **Quick links** widget which also shows the counters for the relevant entities.
